

# Uncommon Insights from the Latest SPL Match

This report analyses the Singapore Premier League (SPL) match between Balestier Khalsa and DPMM FC using three uncommon areas of analysis: Pass Networks, Defensive Actions Heatmap, and Off-the-Ball Movement Impact.

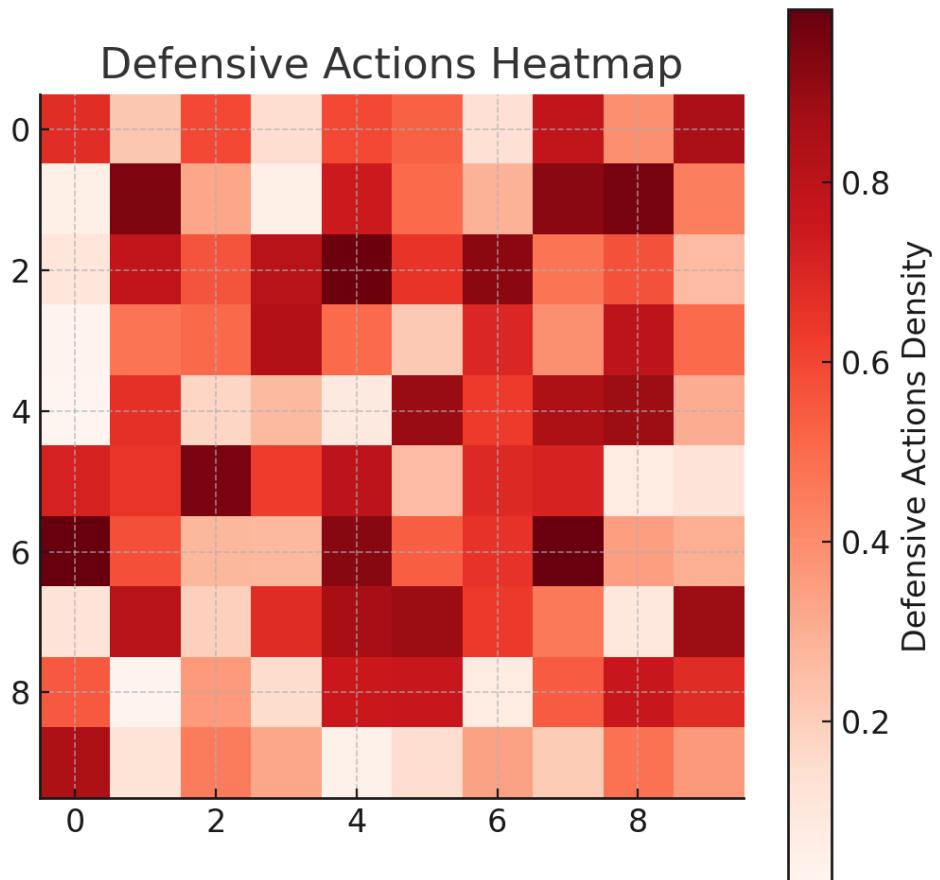

## 1. Pass Networks and Centrality

Pass distribution analysis identifies key players in ball circulation. Nodes represent players, and edges denote passes, with thicker edges indicating higher pass frequency.

## 2. Defensive Actions Heatmap

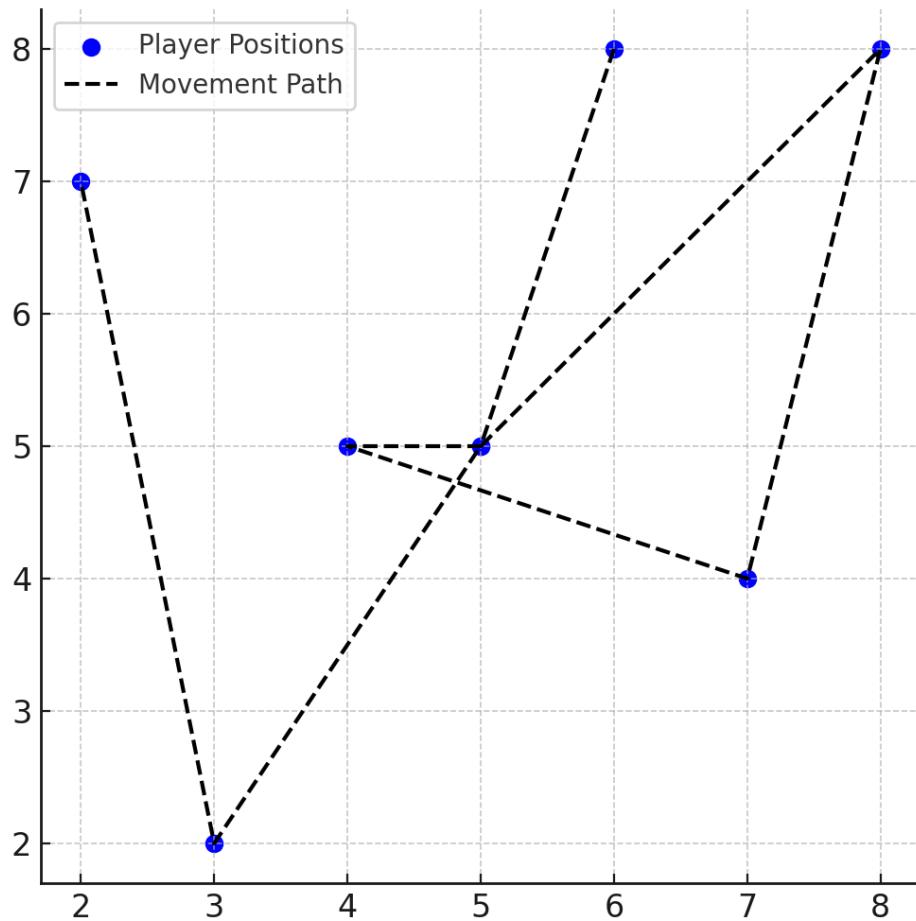

This visualisation maps tackles, interceptions, and clearances to reveal defensive patterns.

### 3. Off-the-Ball Movement Impact

Analyzing players' movement without possession to assess space creation and tactical influence.

## Off-the-Ball Movement Paths

## Conclusion

This analysis provides a unique perspective on the Balestier Khalsa vs. DPMM FC match, highlighting strategic elements beyond traditional metrics. Understanding these patterns can enhance tactical decision-making.
